Assistance

The assembly of the ARABESQUE data set and its subsequent electronic publication on this CD-ROM was primarily undertaken by the individuals credited on the title page. However, it would not have been possible without significant assistance from within BODC and beyond.

The following assistance from BODC personnel is gratefully acknowledged. Meirion Jones, Director BODC, undertook all the administrative work associated with the project including contract negotiations.

Roy Lowry provided the model which was used to assemble and document this data set. He also gave considerable technical support and advice.

This CD-ROM includes over a hundred A4 pages of documentation, much of which has been adapted from the OMEX I CD-ROM. All of this was diligently proof read by Mairi Marshall.

The computer graphics skills of Andy Tabor were responsible for the art work on the CD-ROM inlays and many of the illustrations in this manual.

Steve Loch and Dave Neave produced much of the infrastructure software without which a data management project on this scale could not even be contemplated.

Richard Downer and Zeljko Loncar have provided much assistance through informal supervision and advice on areas where they have specialist knowledge.

Finally, I would like to thank each and every ARABESQUE scientist who took the time and trouble to submit their data.

Trademarks and Copyright

The Adobe Acrobat Reader software has been included on the CD-ROM and the following is acknowledged:

Acrobat(R) Reader copyright (C) 1987-1996 Adobe Systems Incorporated. All rights reserved. Adobe and Acrobat are trademarks of Adobe Systems Incorporated.

There are frequent references in this Users' Guide to the products of Microsoft Corporation. The following is acknowledged:

Microsoft, Windows, Windows95, Word, Excel, Access and Access97 are trademarks of Microsoft Corporation.

All other company and product names herein may be trademarks or registered trademarks of their respective companies.

Accreditation

All data on this CD-ROM will have entered the public domain by the time this CD-ROM is published. However, it is still necessary to acknowledge the source of any data used in subsequent publications just as if the CD-ROM were a journal. Sufficient information has been provided in the Roll of Honour, in the data documentation and as originator codes tagged to the data for the originators to be identified. It is suggested that data be acknowledged by reference to the originator (e.g. Burkill, 1998) with the CD-ROM cited as ARABESQUE Data Set, CD-ROM electronic publication, British Oceanographic Data Centre, Birkenhead, 1998.'
